

Application Process for Permits

Any and all construction within the easements of TCID facilities requires a permit from TCID and BOR approval. The process is not difficult but can be time consuming. This package has been put together to expedite the process and prevent any surprises.

1. Complete the TCID Application - Fill out as much information as you can. You should include any drawings or rough sketches that depict the construction that you would like to do or the area that will be affected by your request.
2. Complete and submit Reclamation's Application – Reclamation's application and instructions are included in this package. TCID does not submit applications to Reclamation. It is the responsibility of the applicant to follow through with Reclamation applications. A TCID permit can not be issued without the approval of Reclamation in most construction requests. Reclamation recommends that before you fill out an application it is important that you contact the local Reclamation office to discuss your proposed use. This discussion can help expedite your application process. The local office is in Carson City and the contact person is Pete Neugebauer at 775-884-8354. Reclamation requires a non-refundable \$100 application fee, payable to the Bureau of Reclamation. The address of the local area office is:

Bureau of Reclamation
Lahontan Basin Area Office
705 North Plaza Street, Rm. 320
Carson City NV 89701-4015

3. Make sure to attach all plans, specifications, maps, and drawings as required under either application.
4. Submit the TCID Application to the office in person or mail it to:
Truckee Carson Irrigation District
P.O. Box 1356
Fallon, NV 89406

The Application must include the appropriate application fee. If the application is not approved by TCID or Reclamation, TCID will refund their application fee but the \$100 application fee to Reclamation is non-refundable.

5. Review and Approval of the O&M Committee - All applications will be reviewed by the O&M Committee. The O&M Committee consists of three members of the Board of Directors the District Manager, and the Deputy District Manager. Your presence is not required at the meeting but it is an open public meeting. The Committee meeting is usually the 3rd Thursday of the Month.
6. Review and Approval of the Board of Directors - In most cases the Committee will make a recommendation to the Board of Directors at their next meeting as to approve or disapprove the application. Most crossings do not require Board Approval. In some cases such as a reduction or release of easement there will have to be a public hearing as well as board approval. If a public hearing is required the notification requirement will add time to the process. All easements belong to the United States so Reclamation approval is required.
7. Issue of Permit – After approval by Committee, Board and Reclamation depending on the requirements of the application a permit will be issued. It is usually good for one year following the date of the signature of the applicant. When the applicant picks up the permit an Inspection fee of \$300 plus a Construction deposit of 20% of the cost of the project is expected. If it is a large project the inspection fee is 1% of the total cost of the project. The Construction deposit is refunded after an inspection has been performed.

APPLICATION FOR TRANSPORTATION AND UTILITY SYSTEMS
AND FACILITIES ON FEDERAL LANDS

GENERAL INFORMATION
ALASKA NATIONAL INTEREST LANDS

This application will be used when applying for a right-of-way, permit, license, lease, or certificate for the use of Federal lands which lie within conservation system units and National Recreation or Conservation Areas as defined in the Alaska National Interest Lands Conservation Act. Conservation system units include the National Park System, National Wildlife Refuge System, National Wild and Scenic Rivers System, National Trails System, National Wilderness Preservation System, and National Forest Monuments.

Transportation and utility systems and facility uses for which the application may be used are:

1. Canals, ditches, flumes, laterals, pipes, pipelines, tunnels, and other systems for the transportation of water.
2. Pipelines and other systems for the transportation of liquids other than water, including oil, natural gas, synthetic liquid and gaseous fuels, and any refined product produced therefrom.
3. Pipelines, slurry and emulsion systems, and conveyor belts for transportation of solid materials.
4. Systems for the transmission and distribution of electric energy.
5. Systems for transmission or reception of radio, television, telephone, telegraph, and other electronic signals, and other means of communications.
6. Improved rights-of-way for snow machines, air cushion vehicles, and all-terrain vehicles.
7. Roads, highways, railroads, tunnels, tramways, airports, landing strips, docks, and other systems of general transportation.

This application must be filed simultaneously with each Federal department or agency requiring authorization to establish and operate your proposal.

OTHER THAN ALASKA NATIONAL INTEREST LANDS

Use of this form is not limited to National Interest Conservation Lands of Alaska.

Individual departments/agencies may authorize the use of this form by applicants for transportation and utility systems and facilities on other Federal lands outside those areas described above.

For proposals located outside of Alaska, applications will be filed at the local agency office or at a location specified by the responsible Federal agency.

SPECIFIC INSTRUCTIONS

(Items not listed are self-explanatory)

Item

- 7 Attach preliminary site and facility construction plans. The responsible agency will provide instructions whenever specific plans are required.
 - 8 Generally, the map must show the section(s), township(s), and ranges within which the project is to be located. Show the proposed location of the project on the map as accurately as possible. Some agencies require detailed survey maps. The responsible agency will provide additional instructions.
 - 9, 10, and 12 - The responsible agency will provide additional instructions.
 - 13 Providing information on alternate routes and modes in as much detail as possible, discussing why certain routes or modes were rejected and why it is necessary to cross Federal lands will assist the agency(ies) in processing your application and reaching a final decision. Include only reasonable alternate routes and modes as related to current technology and economics.
 - 14 The responsible agency will provide instructions.
 - 15 Generally, a simple statement of the purpose of the proposal will be sufficient. However, major proposals located in critical or sensitive areas may require a full analysis with additional specific information. The responsible agency will provide additional instructions.
 - 16 through 19 - Providing this information in as much detail as possible will assist the Federal agency(ies) in processing the application and reaching a decision. When completing these items, you should use a sound judgment in furnishing relevant information. For example, if the project is not near a stream or other body of water, do not address this subject. The responsible agency will provide additional instructions.
- Application must be signed by the applicant or applicant's authorized representative.

If additional space is needed to complete any item, please put the information on a separate sheet of paper and identify it as "Continuation of Item".
